

Lee Leighnard V. Jose

portfolio.leelenardjose.workers.dev | leeleighnardjose@gmail.com | linkedin.com/in/lee-leighnard-jose-328074418

PROFESSIONAL SUMMARY

Results-driven Information Technology graduate from Gordon College with hands-on experience in full-stack web development, cloud infrastructure, and software quality assurance. Proven ability to design and deploy scalable systems end-to-end — from architecting REST APIs and database schemas to configuring VPS environments, CI/CD pipelines, and cloud platforms. Experienced in Agile development workflows through a 500-hour internship at Skydev.Solutions Inc., where contributions spanned QA engineering, frontend development, legacy code maintenance, and AI integration. Passionate about building reliable, user-centered software and continuously expanding technical expertise across modern web technologies.

TECHNICAL SKILLS

Cloud Platforms: Vercel (Frontend Hosting), Render, Cloudflare, Digital Ocean (VPS), GCP
DevOps & CI/CD: GitHub Actions, CI/CD Pipelines, Docker
Programming Languages: Python, PHP, JavaScript, Arduino-Style C++, TypeScript, SQL
Databases: MySQL, MongoDB
Frameworks & Technologies: Angular, Node.js, Express.js, TailwindCSS, Next.js, React
Version Control & Tools: Git, GitHub, Postman, Auth0, Vercel
Methodologies: Agile Development, Technical Documentation
Core Concepts: Object Oriented Programming, REST APIs, WebSockets, JWT Authentication, IoT

HARDWARE & IT SUPPORT

Hardware: Diagnosis, repair, and troubleshooting of desktop and laptop hardware components including CPUs, RAM, storage drives, and peripheral devices
Software Maintenance: Installation, configuration, and maintenance of software applications and system utilities
Operating Systems: Installation and setup of Windows operating systems, including partitioning, driver configuration, and post-install optimization
IT Support: End-user technical support, issue resolution, and system maintenance to ensure operational continuity

PROFESSIONAL EXPERIENCE

Skydev.Solutions Inc.

Software Engineering Intern

Feb. 2026 – May 2026

Olongapo City, Philippines

- Started as a Quality Assurance Engineer, performing functional testing, bug identification, test case writing, test validation, and quality assurance activities to ensure software reliability prior to deployment.
- Collaborated with developers for proper documentation, bug reproduction, and defect tracking, improving communication between QA and development teams.
- Promoted to the Software Engineering team after a month based on performance and project contributions.
- Developed and enhanced frontend features for production applications, improving user experience, responsiveness, and usability.
- Contributed to redesigning the company's landing page using Angular and TailwindCSS, applying desktop-first responsive design principles.
- Resolved legacy code bugs in the company's e-commerce web application using Next.js, TailwindCSS, and Docker.
- Worked within Agile development workflows including code reviews, team collaboration, issue tracking, and technical discussions.
- Utilized Git-based version control, CI/CD practices, and cloud technologies in a fast-paced software development environment.
- Integrated AI as a backup HTML parser to maintain continued functionality in the event of BambooHR structural changes.

Fiesta Communities Castillejos

Administrative & Technology Intern

Jun. 2023 – Aug. 2023

Castillejos, Zambales

- Processed and managed multiple payments for vehicle stickers, ensuring accurate and timely transaction handling.
- Conducted payment audits to improve transaction transparency and accountability.
- Resolved homeowner concerns and issues efficiently, providing responsive community support.
- Developed a web-based interactive Fiesta Communities Map using HTML, CSS, and JavaScript to improve community navigation and information accessibility.

Subic National High School

ICT Laboratory Assistant

2022

Zambales, Philippines

- Maintained and managed computer laboratory hardware to ensure operational readiness for daily academic use.
- Assisted faculty and students with Microsoft Excel operations, supporting data entry and basic spreadsheet tasks.

PROJECTS

HOAMS | *Angular, Node.js, MongoDB, REST API* | hoamssa.pages.dev

- Designed and developed a full-stack Angular/Node.js/MongoDB system for homeowner management and QR-based payment tracking, deployed to cloud-hosted infrastructure.
- Architected and deployed infrastructure using Cloudflare, Cloudinary, Render (initial) and DigitalOcean VPS (final), including DNS, TLS configuration, and object storage for files.
- Implemented JWT-based authentication, role-based access control, account activation via QR codes, and audit logging for compliance and traceability.
- Reduced API response times by 95% through in-memory caching and targeted query/index optimization for high-read endpoints.
- Managed 1,000+ homeowner records with pagination, server-side filtering, and exportable reporting across Monthly Dues, Transactions, and Statements of Account.
- Built a QR-code generation and scanning pipeline to link payments to homeowner accounts, enabling secure, real-time transaction reconciliation.
- Added server-side logging, uptime checks, and metrics to monitor system health and inform performance tuning.
- Introduced unit and integration tests (backend and frontend), automated linting, and Git workflow for PR reviews and branch management.
- Automated build and deployment pipelines (CI/CD) to streamline releases and reduce deployment risk.
- Enforced code reviews and modular design, and collaborated with stakeholders to iterate on product requirements.

LiteraSEE | *ESP32, Arduino, IoT*

- Developed an IoT application using ESP32 as smart eyeglasses to assist dyslexic individuals by reading text aloud.

- Integrated Gemini AI for text correction, OCR Space API for real-world text parsing via camera, and Voice RSS API for text-to-speech output.
- Developed a companion web-server application to display the live camera feed.

VoiceOut! | *Angular, Node.js, MongoDB, REST API* | voiceout.pages.dev

- Developed a full-stack platform for posting notes with video and audio support using WebSocket for real-time post display.
- Integrated Cloudinary API for cloud-based asset storage and implemented pagination to reduce server load.

UNIMART Express | *Angular, Node.js, MongoDB, REST API*

- Built a delivery and ordering platform featuring product listings, a cart system, order history, and inventory tracking.

PractiEase | *Angular, PHP, MySQL*

- Developed a full-stack practicum management system for instructors, company advisers, and OJT students to manage class records and submit internship requirements.

SaveIT Hub | *HTML, Bootstrap CSS, PHP, JavaScript, MySQL*

- Developed a PHP full-stack platform for collecting donations digitally, posting user content, and sharing educational materials.

Rich TV | *React, REST API, Express.js* | richtv.pages.dev

- Developed a web-based movie and series streaming application integrating TMDB API for content discovery and a third-party streaming service for playback.
- Built with React and Express.js, featuring a modern UI and responsive design for seamless viewing across devices.

COMMUNITY EXTENSION PROJECT

New Ilalim School's LMS | *Angular, Node.js, MySQL* | lms-26v.pages.dev

- Developed a Learner Management System serving Instructors, Students, and Administrators with tailored role-based dashboards and workflows.
- Deployed on a VPS with Cloudflare for DNS management, TLS termination, and cloud-hosted accessibility.
- Implemented role-based access control to enforce appropriate permissions across all user types.

ACHIEVEMENTS

Graduated with Highest Honors	2022
• Subic National High School – Information and Communications Technology Strand	
Consistent Dean's Lister	2022 – 2025
• Gordon College – Maintained a GPA ranging from 90%–94% from First Year to Third Year College.	
Cum Laude	2026
• Gordon College – Graduated Cum Laude with a GPA of 92% in Fourth Year College.	

EDUCATION

Gordon College	Olongapo City, Philippines
<i>Bachelor of Science in Information Technology</i>	2022 – 2026
Subic National High School	Zambales, Philippines
<i>Senior High School – ICT Strand</i>	2022
